

## Index

- acetylene ( $C_2H_2$ ) inhibition method, 187  
acetylene reduction activity, 171  
active layer, 58, 65, 76, 105, 113, 135, 153, 177, 207, 219, 226, 233, 241, 268  
afforestation, 257  
agricultural ecosystem, 85  
alas, 11, 58, 103, 129, 207, 216, 227, 233, 268  
– pond, 12  
– process, 217  
alkalinity, 129  
ammonium →  $NH_4$   
aquatic ecosystem, 123  
Aquiturbels, 194  
Aquorthels, 67  
automated chamber system, 155  
basal respiration → respiration  
benzenepolycarboxylic acids, 77  
biocomplex, 171  
biodegradation, 113, 135  
birch forest → forest  
black carbon, 75  
bog, 12, 68, 76  
boreal forest → forest  
*Burkholderia*, 172  
burned area, 39, 55, 164, 259, 273  
burning condition, 40  
burnt stump, 159  
 $^{14}C$  age, 72  
C/N ratio, 7, 72, 93, 103  
Cambisols, 194  
carbohydrate, 141  
carbon budget, 1, 123, 207  
carbon dioxide →  $CO_2$   
carbonate, 103, 131, 217, 233  
catchment, 65, 76, 137  
Central Siberia, 1, 103, 109, 249  
Central Yakutia, 39, 129, 166, 215, 225, 233, 241  
 $CH_4$ , 1, 11, 27, 39, 55, 65, 123, 179, 193, 256, 267  
dissolved –, 123  
charcoal, 56, 75, 161  
chitin decomposition, 186  
chloroform fumigation-extraction method, 183  
classification of protection objectives, 168  
clear-cutting, 241  
closed chamber, 2, 13, 29, 56, 67, 180  
 $CO_2$ , 1, 11, 29, 39, 55, 68, 75, 85, 94, 123, 144, 151, 185, 193, 256, 267  
dissolved –, 123  
combustion efficiency, 41  
coniferous forests → forest  
crown fire → fire  
cryolithozone, 213  
cryoturbation, 80, 103, 207  
decomposition, 7, 11, 35, 40, 71, 78, 93, 106, 109, 113, 135, 163, 177, 199, 208, 222, 268  
deforestation, 166, 257  
degassing, 123  
denitrification, 1, 40, 177  
digital photogrammetry, 208  
dissolved  $CH_4$  →  $CH_4$   
dissolved  $CO_2$  →  $CO_2$   
dissolved  $N_2O$  →  $N_2O$   
dissolved organic carbon → DOC  
dissolved organic matter → DOM  
dissolved organic nitrogen → DON  
disturbance, 2, 23, 29, 40, 55, 75, 163, 188, 211, 216, 225, 241, 268  
DOC, 65, 113, 124, 129, 135, 180  
DOM, 113, 133, 135  
DON, 110, 124, 129, 144  
Dystrochryepts, 67  
earth hummock, 207  
Earth observation, 255  
East Siberia, 12, 27, 39, 58, 103, 129, 151, 159, 171, 207, 233, 241  
Eastern Siberia → East Siberia  
emission ratio, 41  
energy budget, 244  
Fibrilstels, 67  
Finland, 12, 194, 243  
fire, 12, 39, 55, 70, 75, 105, 109, 159, 163, 211, 241, 256, 267  
crown –, 40, 166, 267  
– type, 44  
– return interval, 163  
forest –, 12, 39, 55, 79, 147, 159, 163, 241, 255, 268  
ground –, 41  
number of –, 164  
surface –, 40, 160, 165, 267  
foliar nitrogen, 110

- forest  
 boreal – , 1, 39, 55, 103, 109, 151, 163, 171, 207, 225, 255, 267  
 birch – , 6, 235  
 coniferous – , 167, 199  
 – cover, 227, 255  
 – disturbance, 23, 39, 241  
 – dynamics, 163  
 – fire → fire  
 – floor, 2, 13, 28, 40, 110, 113, 137, 151, 159, 166, 195, 250
